# Problem & Background Statement

Zomato is experiencing a decline in customer engagement, marked by increased order cancellations and a reduction in repeat customers. These challenges are impacting the company's customer lifetime value, market share, and reputation. The key issue is identifying the factors contributing to customer dissatisfaction, such as delivery delays and operational inefficiencies. Through a detailed analysis of customer order history, restaurant performance, delivery times, and payment methods, important metrics—such as average delivery time, order cancellation rates, and customer ratings—will be developed to identify pain points and provide actionable insights for improving the customer experience and operational performance.

# Stakeholder Involvement

In this case study, various internal and external stakeholders play crucial roles. The **Marketing Team** focuses on customer retention strategies, while the **Operations Team** manages the delivery fleet, aiming to reduce delivery times. **Customer Support** handles customer complaints, including refunds and cancellations, and **Executive Leadership** requires a summary of findings to guide strategic decisions. Externally, **Customers** are central to Zomato's success, as their satisfaction impacts revenue and loyalty. Additionally, **Restaurant Partners** influence customer satisfaction through their performance and the efficiency of order preparation.

## Vision

To create an exceptional and seamless food delivery experience by addressing customer pain points, enhancing operational efficiency, and ensuring that Zomato becomes the most trusted platform for both customers and restaurant partners, driving long-term engagement and satisfaction.

## Mission

To identify and resolve factors contributing to customer dissatisfaction by leveraging data-driven insights. This includes improving delivery times, reducing order cancellations, and optimizing restaurant performance to elevate the overall customer experience and reinforce Zomato's commitment to excellence.

# Recommended Analysis

**Q1: What is the average delivery time for completed orders across all cities?**

1. **Bangalore: 57.04 min**
2. Delhi: 57.00 min
3. Hyderabad: 55.23 min
4. Mumbai: 52.31 min

**Q2: Which payment method is the most used?**

1. **UPI: 27.8%**
2. Cash: 25.4%
3. Credit Card: 24.1%
4. Debit Card: 23.7%

# Recommended Analysis

**Q3: What is the distribution of customer ratings across all orders?**

- 1 star (★): 218 orders
- 2 stars (★★): 197 orders
- 3 stars (★★★): 186 orders
- 4 stars (★★★★): 191 orders
- 5 stars (★★★★★): 208 orders

# Recommended Analysis

Q4: Which cuisine type has the highest average order value?

- **Mexican: \$636.23**
- Thai: \$581.54
- Indian: \$576.83
- Chinese: \$571.83
- Japanese: \$553.80
- Italian: \$529.13

# Conclusion

The analysis of Zomato reveals key factors contributing to customer dissatisfaction, including increased order cancellations and delivery inefficiencies. Mexican cuisine shows the highest average order value, while UPI is the most preferred payment method. The distribution of customer ratings highlights areas needing improvement, particularly in lower star ratings.

By addressing these pain points and enhancing operational processes, Zomato can improve customer satisfaction, retain customers, and drive revenue growth, ultimately strengthening its market position and brand loyalty.

# Thank You
